Soft furnishing tips & ideas

Outdoor living décor that will last more than one season – guaranteed!

Before you consider buying any outdoor cushion off the shelf this spring (or online for that matter!) we'd like to show you something.

After a 50 day trial of two cushions – one bought off the shelf from another retailer, the other – one of our own custom made covers made from Warwick Fabrics outdoor range – the result was clear.

The cushion off the shelf barely lasted 50 days. It not only faded but the insert was completely destroyed by the elements of the weather.

The custom made Warwick fabric cover withstood the rain, dust, sun, washed up perfectly and was as bright as day one. It also protected the polyester insert.

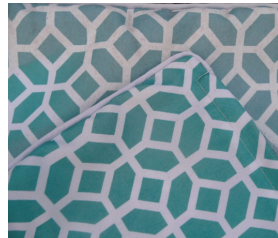

One short season from an off the shelf cushion or multiple summer seasons from our quality UV stabilized outdoor range fabrics? Why throw your hard earned money at products that just don't last?

Spend your money wisely and you will have a product that not only lasts – but can be made specifically for what you want!

Call today to arrange a free no obligation measure and consultation. It's really that easy!

Oct. 31st 2015: Both cushions were exposed to the sun, rain, wind & heat for 50 days straight.

Dec. 20th 2015: After 50 days, the "other" cushion, labeled for outdoor use, not only faded but also failed to protect the cushion insert from decay.

Dec. 20th 2015: After 50 days, a cold machine wash without detergent, the Warwick outdoor fabric held it's colour, shape & protected the cushion insert from decay.

Top: Insert decay without the Warwick Fabric protection!
